

KINAN RAHAL

Industrial Engineer

Process Improvement | ERP Development | Automation

Al Khobar, Saudi Arabia | +966 54 321 2156

kinan.rahal@hotmail.com

PROFESSIONAL SUMMARY

Industrial Engineer combining process improvement with custom ERP development and workflow automation. Built MVC Catering's ERP system to bring orders, warehouse activity, drivers, salary records, sales, and costs into one platform. Experience integrating Salla and WhatsApp and developing operational dashboards to support management decisions and daily coordination.

PROFESSIONAL EXPERIENCE

Industrial Engineer

MVC Catering | Al Khobar, Saudi Arabia | January 2025 - Present

- **Custom ERP development:** Built a business management platform covering order management, warehouse and driver tracking, salary records, and sales and cost monitoring.
- **E-commerce integration:** Connected Salla to the ERP through a webhook, bringing incoming orders into the system to manage fulfillment and identify missing products.
- **Task management:** Created task assignment workflows connected to WhatsApp, linking work allocation with team communication.
- **Deadline automation:** Developed a reminder program to help managers track upcoming deadlines and follow up on commitments.
- **Continuous improvement:** Apply Lean principles and monitor key performance indicators (KPIs) to streamline catering workflows and improve supply chain efficiency.

Process Improvement & Dashboard Developer

Burgerooov | Saudi Arabia | January 2024 - January 2025

- Designed and deployed an operational dashboard with real-time tracking and automated software agents to monitor kitchen activities and workforce productivity.
- Integrated financial tracking and automated notifications to support budget monitoring and operational coordination.
- Applied data analysis and workflow automation to inventory operations, supporting warehouse quality control and material waste reduction.
